

Cisco Umbrella Secure Mobility Promotion*

Your first line of defense...
now at half the cost

Add Cisco® Wi-Fi security to your Cisco access points for full protection at half the cost.

Cisco Umbrella™ WLAN is a cloud-delivered security service that allows you to easily secure your wireless environment and protect any device on your network in minutes. Cisco Umbrella blocks requests to malicious domains and IPs before a connection is ever made, stopping threats earlier.

PROMOTION DETAILS

Add Cisco Umbrella WLAN with eligible Cisco access points to earn:

✓ Up to 6 months of Cisco Umbrella WLAN at no cost, based on a 1-year term

✓ Up to 18 months of Cisco Umbrella WLAN at no cost, based on a 3-year term

SAVINGS EXAMPLE

Securing a 10 access point deployment for 3 years previously cost \$4,000 at a minimum, depending on promotion eligibility. The Cisco Umbrella Secure Access Point Promotion allows you to secure the same solution for as low as \$2,000 by integrating Cisco Umbrella WLAN into Cisco 802.11ac access points.

✓ Offers defense against malware, phishing, and ransomware for Wi-Fi connections

✓ Cloud-based service providing a simple way to protect devices accessing Wi-Fi
