

Built, configured, tested, shipped and ready for business!

Built to Order servers are the simplest sell you'll make!

Ingram Micro's comprehensive Built to Order Server service allows Partners to offer fast, reliable, custom built servers. A fully tested 'out-of-the-box' solution that saves time with on-site installs – it really is that simple!

- 

1 Orders In

What CPU? What type of Blades? **Your customer's unique order** is sent to our warehouse.
- 

2 Servers Built

Your customer's order is built – **a process quicker than going directly to Cisco** and just as reliable!
- 

3 Everything Tested

Servers undergo robust **Cisco-approved testing and validation** by Ingram Micro technical engineers giving you and your customer peace of mind.
- 

4 Safely Delivered

We arrange specialist transportation to protect precision hardware components and deliver direct to your customers' doorstep!
