

More than 40% of victims pay the ransom

In the US alone, over 50% of companies experienced a ransomware incident

Ransomware is a reality
It has become the **most profitable type of malware** ever for cyber thieves!

Globally, 40% of businesses experienced ransomware in the past year

60% of ransom attacks in the enterprise demanded \$1000 or more

Malware landscape continually evolving

More sophisticated

More organised

More costly

LOSS OF SENSITIVE DATA

MAJOR FINANCIAL LOSS

MASSIVE DISRUPTION TO BUSINESS

DAMAGED REPUTATION

Turn the table on cyber thieves!

Ingram Micro and Cisco helps you recognise and fight the threat.

Malware **encrypts** and holds **vital documents and files** until the organisation **pays a ransom** to decrypt the files and get them back.

The Anatomy of an Attack

Know how an attack works

INFECTION VECTOR
User clicks on a malicious link

PAYLOAD EXPLOITS SYSTEM
Ransomware file downloaded

KEY EXCHANGE
Call back to malicious ransomware infrastructure

ENCRYPTION OF FILES
As many files infected as possible

REQUEST OF RANSOM
